

How to Write Development Project Descriptions

An Employment Readiness Guide

Purpose

This guide will help you write your project descriptions for your GitHub Readmes, resume, and LinkedIn.

Instructions

1. Review the example below to help you identify the key information you need to include in your descriptions.
2. Utilize **pages 2-4** to write out your project descriptions.
3. Revisit this guide to write future descriptions.

Example

Project Pitch/Functionality	Your Contribution/Role	Environment/ Technologies Used
<ul style="list-style-type: none"> • Mentor is an application to connect adults with each other to pass on and impart knowledge from mentor to mentee! <p>*1 brief sentence describing what the project is about*</p>	<ul style="list-style-type: none"> • Designed front-end capabilities • Utilized search functionalities to message & connect between mentors and mentees • Designed and implemented back-end functionality to connect users • Implemented a rating system for users to track reputation over time <p>*Describe the features you implemented into the project*</p>	<ul style="list-style-type: none"> • Java, Spring Boot, MySQL 8, Thymeleaf, jQuery, Bootstrap 4, JavaScript, Tomcat <p>*Use the word "Environment" or "Technologies" followed by the corresponding name*</p>

Project Example Description
<p>Mentor: https://github.com/JaneDoe/Mentor</p> <p>Mentor is an application to connect adults with each other to pass on and impart knowledge from mentor to mentee! Designed and implemented front-end and backend capabilities & functionality to connect users through an easy-to-use interface. Utilized search functionalities to message & connect between mentors and mentees. Implemented a rating system for users to track reputation over time.</p> <p>Environment: Java, Spring Boot, MySQL 8, Thymeleaf, jQuery, Bootstrap 4, JavaScript, Tomcat</p>
